## LAB SERVICES

MVR Labs provides analytical services for the testing of all types of fertilizer products. Our services range from elemental analysis to product development consultation. We only use EPA certified methods to provide both accurate and validated results. Our lab and staff also offer troubleshooting tools such as compatibility testing and batch remediation.

MVR lab boasts sophisticated instrumentation such as an Agilent 5100 Inductively Coupled Plasma Optical Emissions Spectrometer (ICP-OES) and an Elementar Vario MAX Cube total carbon and nitrogen analyzer.

Our lab services, both analytical and developmental, are offered to all customers and non-customers alike. We provide cost effective services that are both competitive and accurate. Contact us to see how our laboratory can best accommodate your analytical needs.

## MVR LAB FEE SCHEDULE

N-P-K	\$55	Sodium	\$15
Nitrogen Total	\$25	Sulfur, Total	\$20
P205 Total	\$25	Other Metals (Individual)	\$15
K2O Total	\$24	Micronutrient Package	\$105
Total Carbon	\$22	Heavy Metals Package (no Hg)	\$105
C:N Ratio	\$30	Salt Index (Estimated)	\$15
pH	\$ 9	Acid Digestion (prep)	\$25
Density	\$10	Surface Tension	\$25
Boron	\$15	Emulsion Stability	\$25
		Salt-Out Temperature	\$15
